TDI 2024

Round Table

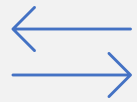
eIDAS2: now that is final, how do we deal with it?

Session Chair: Silvio Ranise

European Digital Identity Wallet (EUDIW)

Document storage

Of **different types** (identity, driving license, passport…)



Enabler of transactions

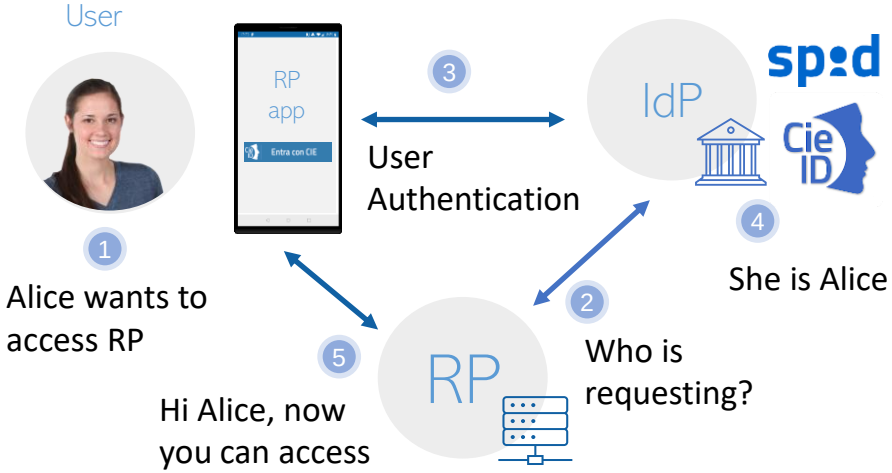
Both **physical** and **digital** world

Signature

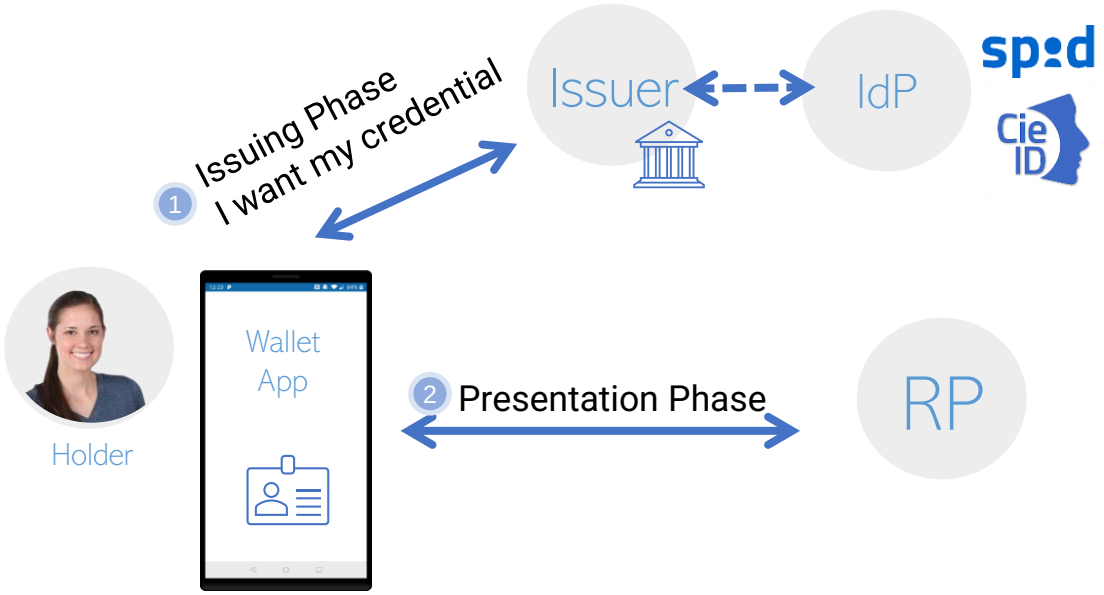
by means of **qualified electronic signatures**

EUDI Wallet
A Different Paradigm

The IdP is involved at each user login attempt



eIDAS 1.0



- The User obtains a credential from the Issuer (e.g., after an authentication of level high with IdPs)
- The User presents the credential directly to the RP (no Issuer or IdPs involvement)

eIDAS 2.0

Panelists

Paolo De Rosa

European Commission

Government

Daniel Fett

Authlete

Standards

Paolo Campegiani

Namirial SpA

Industry

Government: Paolo De Rosa

1st Question

Which are the main motivations that led to this paradigm shift (centralized vs decentralized)?

Standards: Daniel Fett

1st Question

Which are the main impacts of the paradigm shift underlying eIDAS 2.0 on current standards?

Industry: Paolo Campegiani

1st Question

As a company, what are you doing to implement this paradigm shift?

Government: Paolo De Rosa

2nd Question

What arguments can be used to convince the stakeholders to embrace the transition?

Standards: Daniel Fett

2nd Question

What challenges do you see in terms of security compared to traditional IdM systems?

Industry: Paolo Campegiani
2nd Question

How do you plan to integrate the EUDI Wallet into your products?
